Conflux

May 18th, 2013

Katherine Strauss' Lab Space

You scour through the lab's computers and experimental setups. You are fairly confident that Katherine is building a device that will try to send **all** the elementals through the Conduit. The core component of this device is an electromagnet, although it can apparently only function when hooked up to an open connection to the elemental planes. It also requires considerable amounts of power to function.

If Katherine is dead, you should contact a GM now.

Please do not remove this until May 18th, 2012.

Gaming Society.

Please do not throw this away.

Conflux

May 18th, 2013

Sofia Alexandrov's Lab Space

You scour the lab's computers and experimental setups. There is quite a lot of highly encrypted or hastily erased data here, but you can still manage to recover some of the projects. Sofia is primarily researching the process by which elementals enslave humans or elementals, and is trying to replicate it. So far as you can tell, the focus is only on enslaving elementals and not humans. So far, she has managed to create a prototype device in the form of a long rod that can control very weak elementals, but there is also considerable work into Azi tape. Sofia has apparently created a new type of tape that can train Azi to enslave much more powerful elementals, although in its current form such tape is very dangerous (and illegal) to use. There is some evidence suggesting that a prototype version of this tape has already been experimented with several years ago.

If Sofia is dead, you should contact a GM now.

Please do not remove this until May 18th, 2012.
