**A non-functional Elemental
Protection Belt**

When functioning, this belt is
supposed to protect the wearer
from Elemental Attacks. **Do
not open unless directed to
do so.**

A piece of Malachite

If you would like to extract pure
copper from this item, hold it
over a heat source (like lava or
a fire elemental) for 10
seconds. Then open the item.

A piece of Malachite

A non-functional Elemental Protection Belt

This item is now a strip of copper. Copper makes a good cathode for batteries.

The shield is now operational and grants +3CR to defense against elementals who attack you. The item can be used by any human, although it provides *no defense* against elemental enslavement.

Mint Chocolate-Chip Ice Cream

Whatever the effects of White are.

Mm, minty chocolately goodness.

Crystal Geode

A heavy, hemispherical piece
of rock; it is ugly, grey, and
pitted. **If you would like to
break it open to check if it is
a geode, hit it with a CR 4+
attack. If you do so, open the
item**

Crystal Geode

You break open the stone and see that it is indeed a Geode. It has a polished interior, deep blue with brilliant crystals.
